© The Vision Mission, 2014

SUMMARY OF ACHIEVEMENT

300	3	\$11,405 SGD
Cataract surgeries	Camps	Money Raised/Spent
Surgeries conducted were primarily using the SICS - Small (sutureless) Incision Cataract Surgery technique. Clinical assessments were also conducted where necessary.	3 camps conducted in Sambalpur and Kalahandi districts of Odisha, India.	From donors in Singapore – both individuals and corporate. The initial budget was a little over \$8K, but it was quickly determined that we could achieve more, when on the ground.

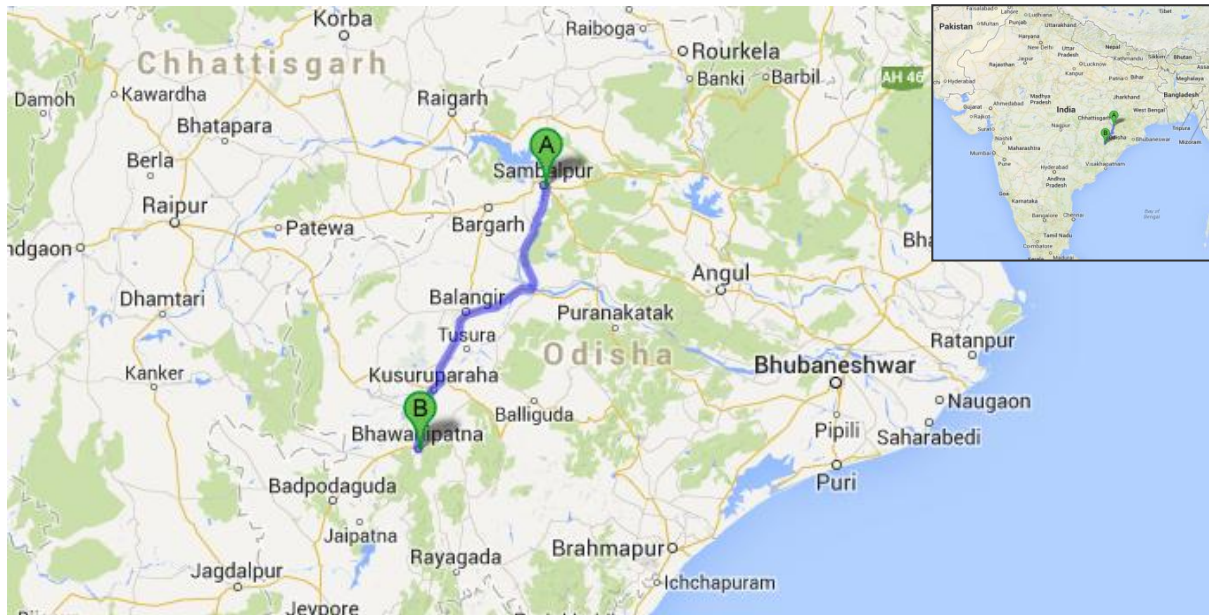

"I shut my eyes and all the world drops dead; I lift my eyes and all is born again."

- Sylvia Plath

WHY THIS PROJECT?

An Introduction to Odisha and Healthcare in the State

Our Camps were held in Sambalpur and Bhawanipatna (Kalahandi district) in Odisha State in India.

Odisha (formerly Orissa) is among the poorer states in India. Odisha is home to a large tribal populace, or Adivasis (known officially as Scheduled Tribes in India), and Scheduled Castes. The western districts such as Kalahandi have a majority population of SC/ST. Typically, the districts and its people tend to be the poorest, with very little access to healthcare. Some statistics on the state of Odisha

- ▶ Population: 36,706,920
- ▶ 513,897 blind people
- ▶ 1,798,639 blind Eyes (Bilateral+Unilateral)
- ▶ 996,446 cataract blind eyes
- ▶ 343,602 new blind eyes due to cataract/yr.
- ▶ Currently doing 86,386 cataract surgeries per year
- ▶ To match the Incidence Odisha need to do 257,216 more cataract surgeries per year. 3 times more....

Trilochan Netralaya and Dr Shiva

The second reason for picking Odisha and these camps for our maiden project was Dr Shivaprasad Sahoo and Trilochan Netralaya (TN). In TN, The Vision Mission has found an ideal complementary partner for achieving its objective. Dr Shivaprasad has worked tirelessly and selflessly over the years in trying to eradicate curable blindness in the region. Dr Shiva, as he is commonly known, has performed over 35,000 cataract surgeries in his career – a staggering number by any standards. He has a team of equally dedicated staff at his establishment who match his diligence and sense of duty.

TN has existing camps in Sambalpur and Kalahandi, and therefore also possesses the methods to bring in people for camps. Often, poor patients have to be brought in from a radius of 150 kms from the site of the camp. They are illiterate and would have no money even to pay for transport. That makes the task of educating them about the benefits of such a surgery, and bringing them over to the camp site quite a challenging one in itself. Flying in from Singapore directly, we would be unable to do this. TN, on the other hand, is very well equipped to do the same.

On the flipside, what TN lacks is something that we have in abundance: Namely, expertise of first world doctors who are well qualified, and are able to look at a variety of problems related to the eye; money and donors.

We have also engaged with Dr Shiva and TN in the past and were familiar with their work and methods.

THE ONE WEEK CAMP: A RUN THROUGH

Day 1: We landed in Sambalpur, Odisha on Sunday 9th February 2014, via train taken from Howrah. After a quick freshen-up, we went down to our base of operation at Trilochan Netralaya. The first day was spent at TN's more remote site at a rustic, countryside facility – called Betty's Ashram. Over 45 cataract surgeries completed.

Day 2: Post-Op Viewing and Care at Betty's Ashram. All patients were fine with no complications with good vision postoperatively. The patients were given breakfast, and then sent off in TNs buses and vans back to their locations. Went over to the main site in Sambalpur town where many patients had come down for the clinic. Dr Shiva had called down the more unique cases for whom he desired a second opinion from the Singapore doctors.

Day 3: More surgeries conducted at Sambalpur. Left for Bhawanipatna in Kalahandi district later in the afternoon, the site of our third camp.

Day 4: Close to 76 surgeries conducted in Bhawanipatna in a single day. Also saw some clinic patients. Left back for Sambalpur later in the day.

Day 5: More surgeries performed taking the grand total to 300. Had an interaction with students from Master of Social Work programme, Sambalpur University. Discussions also with Dr Shiva and team; brainstormed on what more we could do and how we could take this initiative forward.

Left by train to Bhubaneswar in the evening.

HOW WE HAVE HELPED

Free Cataract Surgeries

300 people in Sambalpur and Kalahandi districts spent years of their life suffering without the benefit of proper sight, because they did not have the equivalent of \$30 to cure themselves. They can now see! The donors money helped fund not just the surgery, but also the following:

- Travel costs for bring the patients to the camp, and then back to their village
- Stay and Accommodation – for the purpose of rest and recuperation. Given that the villages are a 100 kms away, it would not be possible for the patients to go back home and then return 3 days later for their Post-Op checkup. Therefore, facilities need to be in place to ensure they can stay at the camp.
- Food – during their stay at the camp
- Lenses
- Cost of nurses and other staff
- Cost of equipment, medicines

Outpatients and Other Ophthalmic Assistance

Dr Shiva also has an outpatient clinic facility where patients with a wide range of conditions are seen by himself and another doctor, Dr Shushant. He took the opportunity to bring back some of the more complex cases - from various subspecialties such as neuro-ophthalmology, pediatric ophthalmology, cornea, glaucoma, uveitis and retina - for a second opinion by our team and discussion for further management. Majority of the patients could be managed in the local setting, although there were a handful of patients who required referral to tertiary centers in Bhubaneswar.

Raising Awareness. Sowing the Seeds for Future Work

The more unexpected parts of the trip included our interactions with young and enthusiastic people. The doctors, nurses and support staff, the students from Sambalpur University, and various others that we met, showcased a great amount of energy to get things done. The Vision Mission team was inspired by Dr Shiva and his team of dedicated staff. The doctors in the team were also very impressed and humbled by the high level of skill exuded by Dr Shiva in managing complicated cataracts. What is needed now is backing in the form of correct training, mentoring and funding so that TN can provide holistic high-quality ophthalmic care beyond just cataracts. It goes without saying that much more can be accomplished in future mission trips in the form of training the staff, and augmenting their skillsets. It did get us thinking that the setting up of some form of tele-medicine facility in those areas could greatly enhance the quality of service (more on that in the section on Future Projects).

FUTURE PROJECTS

Over a few rounds of discussions with Dr Shiva, and other people on the ground, we worked out the following possible future initiatives:

- (1) Tele-Medicine for Sambalpur: Try to setup mechanisms using the state of the art in tele-medicine facilities, such that international experts will be able to assist the doctors and institutes in Odisha through remote means. If this succeeds, then regular assistance can be provided, if necessary, on a weekly basis.
- (2) Providing sub-speciality expertise. Sambalpur still needs to have regular visits by sub-speciality ophthalmologists to help deal with specific and unique cases. This includes doctors having expertise in glaucoma and phacoemulsification.
- (3) Funding a further 500-1000 surgeries per year. To ensure the good work does not stop, and to ensure that we can forever eradicate curable blindness from the region, we wish to try and find the means to commit to regular surgeries of the order of 500-1000 atleast. We wish to consider increasing such numbers in the near future.

THANK YOU!
