

Dr Shiva in the OT

Dr Shiva and Itty preparing the fluorescein angiogram for its inaugural use

Plug was eventually inserted by Dr Shiva . Fluorescein is now being drawn out of the vial.

Dr Shiva attempting several photographs pre-injection to get a feel for the machine.

His technician subsequently takes over for the actual procedure.

And the timer starts on the procedure

She does fantastically for a first-timer. We get brilliantly clear (and useful!) images of this patient. The capillary fallout from his Eale's disease is immense.

Members of his capable staff

Image captured, now comes figuring out how to create the report

Images en route to the train station

Sambalbur Junction station

Don't be dismayed at goodbyes. A farewell is necessary before you meet again. And meeting again, after moments or a lifetime, is certain for those who are friends.
